## SAP Fiori Consultant

Cairo, Egypt | ziad.shararaa@gmail.com | +201066575263 | LinkedIn | GitHub | Military: Postponed

### Summary

SAP Fiori Developer with experience in SAPUI5, Fiori Elements, and OData services for building responsive enterprise applications. Skilled in backend integration using Node.js and .NET, ensuring seamless workflows within SAP environments. Passionate about delivering scalable, user-centric solutions in Agile projects.

### Skills

**SAP:** SAPUI5, Fiori Elements, OData Services, SAP ERP

**Backend:** Node.js, Express.js, ASP.NET Core, SQL Server, MongoDB, MySQL

**Tools:** Git, Postman, REST APIs, Clean Architecture

### Experience

- **Junior SAP Fiori Consultant – Certified IT Consultants CIC** Aug 2025 – Present

Assisting in the design and development of SAP Fiori applications, enhancing user experience through SAPUI5 and OData services. Supporting the implementation of business requirements, debugging, and testing to ensure seamless integration within SAP environments. Collaborated with senior consultants to optimize SAP ERP workflows and ensure high-quality deliverables in an Agile setting. **Skills:** SAP Fiori, SAPUI5, OData, SAP ERP, Front-End Development, E-Commerce Consulting.

- **IT Support Specialist (Intern) – OUD "Orientals for Urban Development"** Jul 2025 – Aug 2025

Completed a one-month IT Support internship, managing various technical tasks independently, including troubleshooting, system configuration, and basic network security management. Gained hands-on experience with Windows Server environments, firewalls, and IT services while developing strong communication and problem-solving skills. **Skills:** Technical Support, IT Services, Windows Server, Firewalls.

### Projects

- **Happy Shop – Scalable E-Commerce API** Node.js | Express.js | MongoDB | JWT | Paymob GitHub

Developed a production-ready modular backend with 30+ RESTful APIs, JWT authentication, and RBAC. Implemented Paymob payment integration, coupon system, cart, wishlist, reviews, and image upload using Sharp. Designed with clean architecture, centralized error handling, and secure order lifecycle, deployed on Railway.

- **Ibtessama – Dental Clinic Management API** Node.js | Express.js | MongoDB | JWT GitHub

Built a robust backend to streamline dental clinic workflows, featuring appointment scheduling, patient record management, and role-based access (admin, doctor, assistant, patient). Secured authentication with JWT, implemented modular structure for scalability, and ensured future integration with frontend and real-time features.

- **NGL Clone – Anonymous Messaging Platform API** Node.js | Express.js | MongoDB | OAuth | Passport.js GitHub

Developed a secure backend for anonymous messaging with Google/Twitter OAuth, encrypted message storage, and session management. Implemented modular architecture with JWT authentication, bcrypt encryption, email notifications, and comprehensive error handling for scalability and security.

### Education

- **Ain Shams University, Faculty of Commerce (English Section)** 2022 – present

- **Digital Egypt Pioneers Initiative (.NET Track)** [Certificate] Oct 2024 – May 2025

Completed 600+ hours of training in ASP.NET Core MVC, Web API, EF, and clean architecture. Built a full-stack Online Bookstore with SQL Server. Also trained in Business English and freelancing basics.

### Languages

**Arabic:** Native

**English:** Professional Working Proficiency
